Amazon India Customer Service & Escalations Guide

> **Document ID:** AMZ-IN-CUSTOMER-CARE
> **Marketplace:** Amazon.in
> **Scope:** Customer service contact options, escalation tiers, delivery disputes, and grievance channels.

1. Support Channels & Intake

Amazon.in provides customer support via 24/7 automated chat, click-to-call phone support, and email. Customers are authenticated against their account credentials before order records or refund status can be shared.

2. Escalation Hierarchy for Complex Disputes

- **Tier 1 (Customer Associate):** Resolves standard order tracking, self-service return creation, and documented refund inquiries.
- **Tier 2 (Escalation Specialist):** Investigates conflicting delivery scans (carrier marked delivered but buyer disputes receipt), missing refunds, and courier transit delays.
- **Leadership Review:** Required for consequential actions including concessions exceeding order limits, fraud investigations, and manual A-to-z claim overrides.

3. Delivery Dispute SLA

When tracking indicates delivered but the customer claims non-delivery, associates must not reject the claim immediately. A carrier trace is launched with the logistics partner (3-day resolution SLA). If the parcel cannot be proven delivered, replacement or refund is authorized.
