Amazon.in Order Cancellation & Doorstep Rejection Policy

Document ID: AMZ-IN-SELLER-CANCEL
Marketplace: Amazon.in
Scope: Order cancellation rules for buyers and sellers across fulfillment stages.

1. Order Cancellation by Fulfillment Stage

- **Unshipped State:** Buyers can cancel orders instantly via the Order History page prior to packaging and dispatch. Prepaid transactions are refunded immediately.
- **Shipped State:** Once the parcel is handed to the logistics carrier and assigned an AWB tracking number, online cancellation is disabled.
- **Doorstep Delivery Rejection:** If a package cannot be cancelled online because it has shipped, the customer must refuse delivery when the courier arrives.

2. Return to Origin (RTO) and Refund Trigger

When an order is rejected at the doorstep, the delivery partner marks the parcel as "Delivery Attempted - Customer Refused". Full refund processing triggers automatically when the carrier records the initial Return-to-Origin scan.

3. Seller-Initiated Cancellations

Sellers may only cancel an order if inventory is out of stock. Excessive seller-cancelled orders negatively impact the seller's Cancellation Rate metric and can lead to seller account suspension.
