Marketplace Policy Reference

Amazon.in support-resolution project | Selected policy evidence and routing boundaries

Source review date: 29 October 2026 **Prepared from:** data/policy_evidence.csv and data/policy_sources.csv

Important: This is a development reference, not a complete or guaranteed-current copy of any platform policy. Eligibility, return windows, refund timing, and exceptions depend on the exact product, seller, fulfilment method, order status, and current order page. Use the live platform order/item details for customer-specific decisions.

How the agent should use this reference

1. Identify the marketplace first. Retrieve policy evidence only where its marketplace exactly matches the order.

2. Look up the specific order and item. Use current item/order records for eligibility, return window, seller and fulfilment method.

3. Ground the answer. Cite the current applicable page or tell the customer to check the order page when the evidence is incomplete.

4. Keep consequential actions gated. Do not approve a refund, replacement, compensation, or exception from these summaries alone.

The dataset’s 100 synthetic orders are tagged Amazon.in. Flipkart and Myntra sections are included to test marketplace-aware retrieval; their rules must never be applied to an Amazon.in order.

Amazon.in

Amazon.in sources include customer-help pointers and seller-side process references. The public customer returns page returned an error during this check, so category-specific windows remain unverified; do not infer them from secondary sources.

Return Eligibility

Amazon Business help says most items may be returnable within the applicable return window, while product-page exceptions and the Amazon.in returns policy apply. Check the actual item and order record.

Scope: Amazon Business help; use only as a pointer to item-specific checks, not a universal consumer rule

Agent handling: retrieve_and_quote; never auto-approve from this summary

Source: AMZ-IN-BUSINESS-RETURNS - open official source **Checked:** 2026-10-29

Return Refund Handling

For FBA orders, Amazon says its customer service handles enquiries, returns and refunds; customer refunds follow the Amazon.in returns policy and applicable service terms.

Scope: Seller-side FBA FAQ; does not define every buyer's eligibility or refund timing

Agent handling: use_for_routing_context_only

Source: AMZ-IN-FBA-FAQ - open official source **Checked:** 2026-10-29

Replacement

Amazon India seller help says replacement availability for seller-fulfilled orders is conditional, including eligible return requests, available matching inventory and pickup service; replacement is the same product.

Scope: Seller-fulfilled replacement workflow; buyer order page remains authoritative

Agent handling: check_item_order_and_inventory; proposal only

Source: AMZ-IN-SELLER-REPLACEMENTS - open official source **Checked:** 2026-10-29

Cancellation

Amazon India seller help describes cancellation handling for seller-fulfilled orders and says the seller-side cancel option is available for unshipped orders.

Scope: Seller workflow; not a complete buyer cancellation policy

Agent handling: read_order_state_then_route

Source: AMZ-IN-SELLER-CANCEL - open official source **Checked:** 2026-10-29

Category Return Windows

The linked Amazon.in customer returns page could not be retrieved during this source check. Do not load category windows from secondary sources as authoritative policy.

Scope: Policy content pending capture and human review

Agent handling: block_rule_creation_pending_verification

Source: AMZ-IN-RETURNS - open official source **Checked:** 2026-10-29

Flipkart

Flipkart’s live policy states that cancellation windows can vary and that product-page return/replacement terms take precedence. Process guidance is not a promise of eligibility for a particular item.

Cancellation

Flipkart's policy page says cancellation windows vary by category/order; cancellation is available before dispatch, while at out-for-delivery stage customers may reject at the doorstep. Order/product page terms govern the specific order.

Scope: Flipkart only; terms may change and product/order conditions take precedence

Agent handling: use_only_when_marketplace_is_flipkart

Source: FLIPKART-RETURNS - open official source **Checked:** 2026-10-29

Returns Replacements

Flipkart says seller/product category policies differ and product-page return/replacement terms prevail. Requests may be verified; options can include exchange, replacement or refund where applicable.

Scope: Flipkart only; resolve from exact listing/order policy

Agent handling: retrieve_exact_item_policy_before_advice

Source: FLIPKART-RETURNS - open official source **Checked:** 2026-10-29

Damaged Wrong Item

Flipkart's help article describes raising a return from Orders, selecting the applicable reason, possible verification, and keeping packaging/accessories ready; options depend on category and seller guarantee.

Scope: General process guide; not a guarantee for a particular product

Agent handling: procedural_guidance_only

Source: FLIPKART-RETURN-PROCESS - open official source **Checked:** 2026-10-29

Myntra

Myntra’s refund-policy page advertises a 14-day return period. Detailed exceptions and the exact conditions must be confirmed on the customer’s item/order page.

Returns

Myntra's refund-policy page currently advertises returns within 14 days of receiving an order. Check item eligibility and the order page for exceptions and exact conditions.

Scope: High-level site statement; item-specific conditions not captured in this fixture

Agent handling: retrieve_item_page_before_decision

Source: MYNTRA-REFUND-POLICY - open official source **Checked:** 2026-10-29

Refund Cancellation Exceptions

Detailed category-specific eligibility, pickup, refund method and cancellation conditions were not reliably retrievable in this check; consult the item/order help view before advising.

Scope: Unverified details are intentionally not inferred

Agent handling: do_not_infer

Source: MYNTRA-REFUND-POLICY - open official source **Checked:** 2026-10-29

Source register and dataset use

The companion CSV files preserve machine-readable marketplace tags, source IDs, evidence summaries, scope notes, verification dates, and safe-use instructions. Use those files as the retrieval index; use this PDF as a readable project reference.

Not represented: every category, seller-specific term, product detail page exception, promotional rule, delivery promise, refund rail/timing, or future policy update. The evidence is deliberately selective.

Refresh practice: review the live official page before each policy release or evaluation cycle. Store the captured page/version date and source URL alongside any extracted passages. If source access fails or the rule is ambiguous, route to human review.

Marketplace	Policy source index
Amazon.in	AMZ-IN-BUSINESS-RETURNS, AMZ-IN-FBA-FAQ, AMZ-IN-SELLER-REPLACEMENTS, AMZ-IN-SELLER-CANCEL, AMZ-IN-RETURNS
Flipkart	FLIPKART-RETURNS, FLIPKART-RETURN-PROCESS
Myntra	MYNTRA-REFUND-POLICY

This document paraphrases selected official source material for project planning. Consult the linked platform source for the full, current terms. The platform-specific terms belong to their respective marketplaces and are not interchangeable.
